Why Does My Popup Open Only Once?

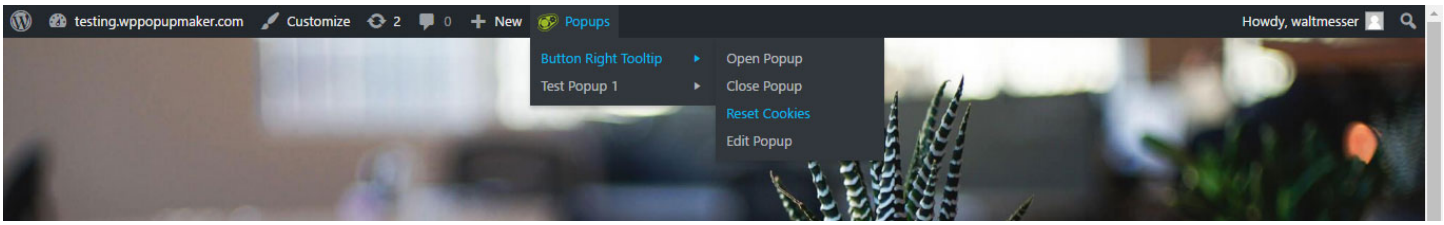

Cookies · https://wppopupmaker.com/docs/cookies/my-popup-only-opens-once/

If your popup only opens once and does not open again, a cookie is probably linked to the trigger and set within the browser. Reset the popup cookie on the front end of your site with the Popup Admin Toolbar.

In the Popup Admin, move your cursor to the upper right hand corner and select 'Visit Site'.

On the front end of the site, select the 'Popup Maker' option in the Admin toolbar.

Select the name of your popup, and then select the option 'Reset Cookie' (see screenshot below).

Refresh the page, and see if the popup works again.
